

# Keep Our Beaches Clean

- Over 1 million seabirds and 100,000 sea mammals are killed by pollution every year.

- The National Academy of Sciences estimated in 1997 that around 6.4 million tons of litter enter the world's oceans each year

By far the majority originates from land-based sources. Some of it is sewage-related debris that is washed down rivers into the sea, or wind-blown waste from refuse dumps located on the coast, but some of it comes from careless beach visitors who leave their litter lying on the sand.

## Don't Be One Of These Visitors

By using the bag provided to store your trash and/or collect others, you'll be making this beach a cleaner and safer place!
